

5-2500MHz SMATV SPLITTER

The **SDx** series are one ports power passing model which can split RF signal, from HF, FM, VHF, UHF, to satellite - IF.

The power (plus voltage) passing direction is from OUT port to IN port and DC drop voltage is about 0.7V.

Features:

- SMATV Full Band 5-2610MHz
- Zinc Die-cast High Shielding Case
- Built-in rectifier diode
